

Utilities for intrinsically safe SuperJet Micronisers.

Block Diagram & General Layout

Nitrogen Generator Skid

N₂ capacity: 4000 lts/min at 10 barg
N₂ purity: 95-99.9%, adjustable

Features: Hollow fiber membrane technology that works by filtering oxygen from a stream of compressed air to yield gaseous, compressed nitrogen at adjustable purity, up to 99.99%. The operation is automatic and unattended, incorporating an advanced PLC for total safety.
